

# Workshop on Innovative Microscopy and Spectroscopy of 2D and Related Materials

 May 14 -16 2025

 Pisa (Italy)

Domus Comeliana

Palazzo della Carovana

## Scope

Topics will include **Photoelectron Spectroscopy**, **Electron Microscopy**, **Optical Spectroscopy**, and **Scanning Probe Microscopy**, with a focus on advancing the field through collaboration and innovation.

At the conclusion of the scientific program on the first day, participants will have the opportunity to **visit the laboratories of the 2D Materials Engineering group**.

## Target

The Workshop welcomes contributions from established **researchers**, young researchers, **postdocs**, and **students** who would like to share their findings, exchange ideas, and engage in discussions on the latest advancements and challenges in the field.

## Dates

Abstract submission closes: **March 23<sup>rd</sup> 2025**

Registration opens: **April 1<sup>st</sup> 2025**.

Fee: **300 €** (VAT excluded)
